

### Modifications

Do not remove any original equipment or modify your vehicle in any way that would alter its design or operation. This could make your vehicle unsafe and illegal to drive.

For example, do not make any modifications that would change the ride height of your vehicle, or install wheels and tires with a different overall diameter.

Such modifications can adversely affect handling, and interfere with the operation of the vehicle's anti-lock brakes and other systems.

In addition, any modifications that decrease ground clearance increase the chance of undercarriage parts striking a curb, speed bump, or other raised object, which could cause your airbags to deploy.

Do not modify your steering wheel or any other part of your Supplemental Restraint System. Modifications could make the system ineffective.

### Additional Safety Precaution

***Do not attach or place objects on the airbag covers.*** Any object attached to or placed on the covers marked "SRS AIRBAG," in the center of the steering wheel and on top of the dashboard, could interfere with the proper operation of the airbags. Or, if the airbags inflate, the objects could be propelled inside the vehicle and hurt someone.
