

## Protecting Adults

---

- ***Do not place hard or sharp objects between yourself and an airbag.***

Carrying hard or sharp objects on your lap, or driving with a pipe or other sharp object in your mouth, can result in injuries if your airbags inflate.

- ***Do not attach or place objects on the front airbag covers.*** Any object attached to or placed on the covers marked “SRS AIRBAG” in the center of the steering wheel and on top of the dashboard could interfere with the proper operation of the airbags. Or, if the airbags inflate, the objects could be propelled inside the car and hurt someone.

- ***Keep your hands and arms away from the airbag covers.*** If your hands or arms are close to the airbag covers in the center of the steering wheel and on top of the dashboard, they could be injured if

the airbags inflate.
