

Placing a Child Seat

This page briefly summarizes Honda's recommendations on where to place rear-facing and forward-facing child seats in your vehicle.

Airbags Pose Serious Risks to Children

The passenger's airbag inflates with enough force to kill or seriously injure an infant in a rear-facing child seat.

A small child in a forward-facing child seat is also at risk. If the vehicle seat is too far forward, or the child's head is thrown forward during a collision, an inflating airbag can kill or seriously injure the child.

If a small child must ride in the front, follow the instructions provided in this section.

Front Passenger's Seat

Infants: Never in the front seat, due to the passenger's airbag hazard.

Small children: Not recommended, due to the passenger's airbag hazard. If a small child must ride in front, move the vehicle seat to the rear-most position and secure a front-facing child seat with the seat belt (see page 34).

Back Seat

Infants: Recommended positions. Secure a rear-facing child seat with the seat belt (see page 30).

Small children: Recommended positions. Secure a front-facing child seat with the seat belt (see page 34).
