

## Protecting Children

---

If you decide that a child can safely ride up front, be sure to:

- Carefully read the owner's manual and make sure you understand all seat belt instructions and all safety information.
- Move the vehicle seat to the rear-most position.
- Have the child sit up straight, back against the seat, and feet on or near the floor.
- Check that the child's seat belt is properly positioned and secured.
- Supervise the child. Even mature children sometimes need to be reminded to fasten the seat belts or sit properly.

### Using Child Seats with Tethers

Your Honda has three attachment points for securing a tether-style child seat to the vehicle.

Since a tether can provide additional security, we recommend using a tether whenever one is required or available.
