

### Tailgate Pocket

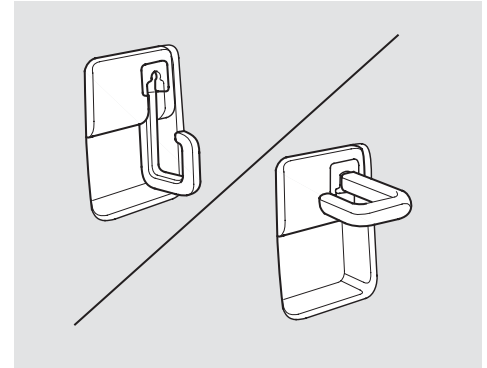

To use the tailgate pocket, turn the knobs and remove the lid. Items stored in this pocket can be secured by the belts inside the pocket.

### Cargo Hooks

The hooks on the floor of the cargo area enable you to tie down items stored in the back. Make sure all stored items are secured before driving.

The hook on the tailgate door pivots, allowing items to be stored in different ways. Make sure any items put on this hook weigh less than 6.5 lbs (3 kg), or you could damage the hook.

Do not open or close the tailgate door with cargo on this hook.
