

Accessories and Modifications

Modifications

Do not remove any original equipment or modify your vehicle in any way that would alter its design or operation. This could make your vehicle unsafe and illegal to drive.

For example, do not make any modifications that would change the ride height of your vehicle, or install wheels and tires with a different overall diameter.

Such modifications can adversely affect handling, and interfere with the operation of the vehicle's anti-lock brakes and other systems.

In addition, any modifications that decrease ground clearance increase the chance of undercarriage parts striking a curb, speed bump, or other raised object, which could cause your airbags to deploy.

Do not modify your steering wheel or any other part of your Supplemental Restraint System. Modifications could make the system ineffective.

Additional Safety Precautions

- ***Do not attach or place objects on the front airbag covers.*** Any object attached to or placed on the covers marked "SRS AIRBAG," in the center of the steering wheel and on top of the dashboard, could interfere with the proper operation of the airbags. Or, if the airbags inflate, the objects could be propelled inside the vehicle and hurt someone.

Only on models equipped with side airbags

- ***Do not attach hard objects on or near a front door.*** If a side airbag inflates, a cup holder or other hard object attached on or near the door could be propelled inside the vehicle and hurt someone.
- ***Do not place any objects over the outside edge of a front seat-back.*** Covering the outside edge of a front seat-back, with a non-Honda seat cover for example, could prevent the airbag from inflating properly.
