

# Your Vehicle's Safety Features

---

These safety features are designed to reduce the severity of injuries in a crash. However, you and your passengers can't take full advantage of these safety features unless you remain sitting in a proper position and ***always wear your seat belts properly***. In fact, some safety features can contribute to injuries if they are not used properly.

## Seat Belts

For your safety, and the safety of your passengers, your vehicle is equipped with seat belts in all seating positions.

Your seat belt system also includes a light on the instrument panel to remind you and your passengers to fasten your seat belts.

## ***Why Wear Seat Belts***

Seat belts are the single most effective safety device for adults and larger children. (Infants and smaller children must be properly restrained in child seats.)

Not wearing a seat belt properly increases the chance of serious injury or death in a crash, even though your vehicle has airbags.

In addition, most states and all Canadian provinces require you to wear seat belts.
