

Seats

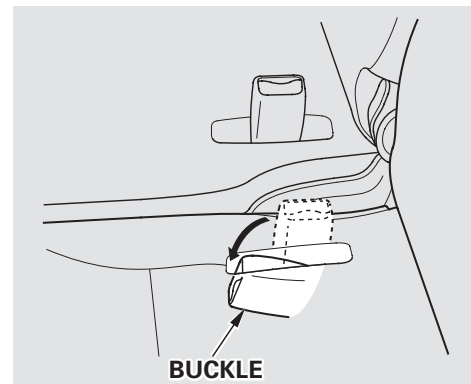

Reverse this procedure to return the front and rear seats to the upright position. Make sure you install the head restraints and the seats are locked securely before driving.

When you return the seat-back to the upright position, hold the seat-back to keep it from going up too quickly.

Folding the Rear Seats

The rear seat-back can be folded down to give more cargo room. Each side folds down separately. With only half the seat folded, you can still carry a passenger in the rear seat.

You can also fold up each of the rear seats separately to create further cargo space (see page 106).

1. Push the seat belt buckles into the seat cushion.
