## Placing a Child Seat

This page briefly summarizes Honda's recommendations on where to place rear-facing and forward-facing child seats in your vehicle.

### Airbags Pose Serious Risks to Children

The passenger's front airbag inflates with enough force to kill or seriously injure an infant in a rear-facing child seat.

A small child in a forward-facing child seat is also at risk. If the vehicle seat is too far forward, or the child's head is thrown forward during a collision, an inflating front airbag can kill or seriously injure the child.

If a small child must ride in the front, follow the instructions provided in this section.

### Front Passenger's Seat

**Infants:** Never in the front seat, due to the front airbag hazard.

**Small children:** Not recommended, due to the front airbag hazard. If a small child must ride in front, move the vehicle seat to the rear-most position and secure a forward-facing child seat with the seat belt (see page 39).

### Back Seats

**Infants:** Recommended positions.

Properly secure a rear-facing child seat (see page 35).

**Small children:** Recommended positions. Properly secure a forward-facing child seat (see page 39).
