

Accessory Power Sockets

Your vehicle has two accessory power sockets. One is located on the dashboard, and the other is on the left side of the cargo area.

To use an accessory power socket, pull up on the cover.

These sockets are intended to supply power for 12 volt DC accessories that are rated 120 watts or less (10 amps). To power an accessory, the ignition switch must be in ACCESSORY (I) or ON (II).

When both sockets are being used, the combined power rating of both accessories should be 120 watts or less (10 amps).

They will not power an automotive type cigarette lighter element.
